

# FREE Year 4 Sustainability Workshop

**Fully resourced.  
Curriculum-linked.  
Ready to deliver.**

[SustainableBear.com](http://SustainableBear.com)

# Meet Sustainable Bear

## The cuddly companion that makes learning stick

This FREE sustainability workshop comes with complete downloadable resources - everything you need to deliver engaging lessons. But you can take it further with Sustainable Bear: a soft, cuddly teaching companion available as an optional enhancement.

Here's where the magic happens... when children have their own Sustainable Bear to hold, learn with, and take home throughout the workshop, something special happens. They cuddle it, name it, and show their families. And every time they do, those important lessons about protecting our planet come flooding back.

### Optional Enhancements

#### Add a Teaching Bear

A large Sustainable Bear for classroom demonstrations.

#### A Bear for Every Child

The magic option! Every child gets their own Sustainable Bear to learn with and take home to share the learning with their family.

**The workshop was brilliant, great engagement with the children and of course, the bears went down really well!**

— Heathcote Primary School

# Introducing a sustainability workshop that does the work for you

The Sustainable Bear Workshop is a **FREE**, curriculum-linked session for Primary Schools with hands-on activities, engaging stories, and practical learning that children genuinely connect with. Perfect for Year 4 but adaptable for other year groups, it's flexible enough to work across different ages.

**And it fits perfectly with what you're already teaching:**

- ✓ Year 4 Science (Living Things & Habitats)
- ✓ Geography (Human Impact & Responsibility)
- ✓ PSHE/Citizenship
- ✓ Ofsted enrichment and SMSC evidence
- ✓ Supports Eco-Schools & Green Flag initiatives

## **Everything's included -**

Slides, worksheets, activities, and full guidance. No planning. No prep. Just meaningful learning that supports your curriculum and gives you solid enrichment evidence.

# From Classroom to Home

When children learn with Sustainable Bear, something clicks. They understand how their choices affect habitats, how to reduce waste, and why sustainable materials matter.

But the best bit? **The learning doesn't stop at the school gate.**

Sustainable Bear helps families put those lessons into action at home - with simple, everyday swaps that genuinely make a difference. From the products they buy to the choices they make, children become sustainability champions in their own homes.
